

- Our application proposes to create a full fledged tutorial given a text file (Textbook chapters, pdf documents, etc) The tutorial will consist of short ppts/videos based on the text file given.
- The entire application is enabled to support various Indian regional Languages to facilitate learning in language of choice providing language agnosticism.
- In addition to this, assessments are provided after every subtopic to ensure user interaction.

- A complete user friendly web interface is created for easy use of all the features and hassle free learning and customization based on the user's preferences.
